DIGITAL PRINT

DIGITAL PRINTING:- Our Edge printer heat applies colours to vinyl. Photographs, digitally created logo's and clip art pictures can be easily reproduced at virtually any size. A range of process colour and spot colours linked to Pantone palettes can create a plethora of shades. Contour cutting enables removal of backgrounds and produces interesting stickers. Badges and labels can be produced with individual names, numbers or details. Sign faces can be made with the text printed rather than cut and applied. All printing can be overcoated with clear abrasion and U.V. guard. Images from brochures or previously hand painted can be scanned and reproduced.

This is an ideal way of creating regulation and custom Health and Safety signage. Reflective films, Luminescent and other speciality films can be used such as Brushed Aluminium, Refractive and Metallics.

Ultra-Destructible materials can be used for labelling items which need protection. Reverse printing to clear film enables images to be applied to glass. Large format printing for fascia's, vehicles and banners can be supplied.

SPECIALITY FONTS & CUSTOM LOGO'S can be reproduced giving 3D detail to text and images. Compare the samples shown.

Office: Normandy Cottage, 54 Linersh Wood Close, Bramley, Surrey. GU5 0EQ
